Profile

I'm a front-end web developer and ux designer working with modern web technologies. I have a deep passion for keeping my craft sharp along with a focused eye on aesthetics, nuances and every little detail in-between.

Experience

UX Developer @ BondDesk/Tradeweb, Jun 2014 - Present

Working with the product team designing new ui brands along with theming via CSS, developing new features and fixing UI HTML, CSS and JavaScript issues within our Ext JS web applications. Refactoring CSS, HTML and JavaScript with a DRY methodology.

JavaScript UI Developer @ MOTOR Information Systems, Oct 2013 - Jun 2014

Worked with a team of developers building a single page application using Bootstrap, Backbone, Marionette, Underscore and jQuery. Maintained {less}, HTML templates and was tasked with cleaning up and optimizing {less} and HTML templates. Created font icon libraries to replace the plethora of png files, sprite maps and unoptimized vector based icons.

Creative Developer / Senior Flash Developer @ Team Detroit, Oct 2006 - Oct 2013

Was an advocate of and responsible for HTML5, CSS3 and JavaScript projects within the digital creative group. Tasks included developing fully functional prototypes, pro-bono projects, mentoring designers and solving ux problems. Developed and maintained Team Detroit's site and many other internal company related projects.

Front End Developer / Senior Flash Developer @ Leo Burnett, Mar 2005 - Oct 2006

Was responsible for Flash development on the GMPP and Goodwrench sites. Designed and developed Flash and front-end content from enterprise to brand experience sites. Reported directly to the Creative Director also helped manage vendors and creative technologist for client presentations.

Front End Developer / Senior Flash Developer @ Quicken Loans, Mar 2004 - Mar 2005

Front-end web developer and flash developer on rockfinacial.com and quickenloans.com. Worked with a team of web developers to create internal and external flash content.

Flash Developer @ Wunderman, Jan 2002 - Mar 2004

Worked closely with the Sr. Art Directors to ideate, prototype and build Flash based content for the Mercury and Lincoln websites. Rebuilt the Lincoln flash site to incorporate deep linking, smoother and smarter transitions and significantly reduce the size of all the swf's. Created a lightweight AS1 MC**ish framework for new flash projects.

Skill Set

HTML5, CSS3, JavaScript, Bootstrap, Sass, {less}, jQuery, Backbone, Marionette, Underscore, Handlebars, Ext JS theming, Grunt, Bower, Yeoman, Node, npm, Statamic, JSON, RESTful Web Services, Git and CLI.
